DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 3 stands rejected under 35 U.S.C. 102(b) as being anticipated by Arehart et al (#6,230,455).

Arehart et al show a structure comprising an endless main frame (12) (see Appendix A- Figure 4) including a groove defined in a side and extending along an entire length, the groove being delimited by a bottom wall and an inner peripheral wall having an endless end face, a mesh (64) fixed to the endless face of the inner peripheral wall delimiting the groove, a decorative frame (52) mounted to the side of the endless main frame and covering the groove and the endless end face of the main frame, and a covering member (62) covering the decorative frame wherein the bottom wall delimiting the groove has a plurality of fixing holes defined. The decorative frame has a plurality of holes with a plurality of fasteners (54) respectively extending through the holes of the decorative frame and the fixing holes of the bottom wall delimiting the groove.

Response to Arguments

Art Unit: 3636

Applicant's arguments filed January 31, 2005 have been fully considered but they are not persuasive. It's the examiner's position that claim 3 stands rejected under 35 U.S.C. 102(b) as being anticipated by Arehart et al (#6,230,455). The applicant has argued that the structure of Arehart et al does not disclose the applicant's backrest invention. The examiner disagrees. The prior art of Arehart et al is deemed to be valid, since Arehart et al show each and every element of the applicant's claimed invention. A user can rest his back against the structure of Arehart et al, and this would be interpreted as a backrest. In addition, the applicant stated that the prior art does not show a groove. In response, the examiner would like to direct the applicant to Appendix A- Figure 4, wherein a groove is shown to be on a side and extending along an entire length, the groove has been delimited by a bottom wall and an inner peripheral wall having an endless end face.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 3636

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
